Gentlemen:

I am writing to support the de-commissioning of the Black Mountain Sewer Processing plant here in the Boulders community. This plant is located near my home and the on-going problems have continued for many years. The offensive smell, noise, and traffic connected to this facility have been major problems that can be solved NOW by the de-commissioning.

I am also concerned that the troubles with this plant (which despite attempts, have not been solved) will adversely affect the value of my home. I understand the cost to remedy this situation would be minimal, given the circumstances, and I am willing to share in that cost to get rid of this processing plant.

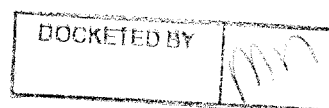

This sewer treatment is obsolete, the source of many problems, and a major nuisance to the community. Please take the appropriate action and approve the decommissioning of this plant as soon as possible.

Thank you for your consideration.

Gentlemen:

I own a second home at 1606 Quartz Valley Dr. in Scottsdale, AZ 85266 (in the Boulders) and wish to support the de-commissioning of the Black Mountain Sewer Processing plant near this home. The odors from this facility have been a major problem for many years. In addition, the traffic, noise, and dust are causing a decrease in the value of my property.

The problems mentioned above have not been corrected, despite many efforts over the years. You now have the chance to correct this problem at a cost that would be quite low; I would be more than willing to have an increase in my sewer bill to close this plant permanently.

This sewer plant is major nuisance to the entire Boulder's community. I would request that you approve the decommissioning of this plant as soon as possible.

Thank you.

Mary L. Crowley

Black Mountain Sewer
Docket Control No. SW-02361A-08-0609

Dear Commissioners,

I support de-commissioning the Black Mountain Sewer Processing Plant located in the midst of a beautiful residential neighborhood within 100 feet of adjacent residences. I recognize that there will be some costs to Black Mountain Sewer users involved in this de-commissioning and remediation effort, and I am willing to accept my share of these costs.

The problems my neighbors and I are experiencing prompting me to write this letter are identified below:

- Strong and nauseating odors, offensive to both Boulders residents and Boulders Resort guests, frequently coming from the Processing Plant
- Health concerns from chemicals required to be inserted trying to mitigate the odors
- Loud noises coming from the Processing Plant
- Frequent repair and pumper trucks driving through the residential neighborhoods of the Boulders, and parking in front of the Processing Plant
- Decreased home and property values because of the proximity of the Processing Plant to many homes within the Boulders, and the odors, noises and truck traffic associated with the Processing Plant
- It would be more efficient to de-commission the Processing Plant now, rather than continue to waste more funds each year in costly repairs and then de-commissioning the Processing Plant and remediating the land at a later date.

Thank you for your consideration of this request.

Docket Control No. SW-02361A-08-0609

Dear Commissioners,

I support de-commissioning the Black Mountain Sewer Processing Plant located in the midst of a beautiful residential neighborhood within 100 feet of adjacent residences.

The problems my neighbors and I are experiencing from this antiquated and mal-functioning Processing Plant are identified below:

- **Strong and nauseating odors, offensive to both adjacent and near-by homeowners and Boulders Resort guests** coming from the Processing Plant
 - **Health concerns from chemicals** required to be inserted into the Black Mountain Sewer system from pumper trucks at different locations of the system trying to mask the odors
 - **Loud noises** coming from the Processing Plant
 - **Frequent repair and pumper trucks** driving through residential neighborhoods to service the Processing Plant, and parking in front
 - **Decreased home and property values** because of the proximity of the Processing Plant to many homes within the adjacent residential neighborhood and the frequent heavy truck traffic required to service the Processing Plant
 - **It would be more efficient to de-commission the Processing Plant now**, rather than continue to waste more funds each year in costly repairs and then de-commissioning the Processing Plant and remediating the land at a later date.
 - Other reason(s):
-
-

I recognize the value of de-commissioning this Sewer Processing Plant and believe that the modest cost involved in accomplishing this now would be a wise investment for the future.

Thank you for your consideration,
